

Creating Value from EMR Investment

Kevin Maben, MD, FAAP

Associate Medical Information Officer

Presbyterian Healthcare Services

Health Care is Changing

Transition from Fee for Service to Value Based Purchasing

How are Physicians Measured?

- Consumer Assessment of Healthcare Providers and Systems
 - H-CAHPS (Hospital)
 - CG-CAHPS (Clinician and Group)
- Healthcare Effectiveness Data and Information Set
 - HEDIS
 - Rates care given to health plan member
 - Reported publically by NCQA
- Physician Quality Reporting System
 - PQRS
 - Quality of care reporting to Medicare
- Medicare Stars
- Centennial Care (Medicaid)
- Commercially Insured Groups

Merit Based Incentive Payment System (MIPS)

- Replaces SGR
- Effective 2018
- Each Provider receives a score (1-100)
- Changes to Provider Payment
 - Quality and Cost
 - Meaningful Use
 - Clinical Improvement
- CMS will publish individual scores

The BEST way to reduce cost of Care

- QUALITY

Appropriate Care

Evidence Based Care

Translating HER Investment to Value

EHR's improve Quality, Safety and Efficiency of
Care

EHR Functionality to drive QUALITY

Decision Support

Patient Safety

Evidence Based Care

Care Pathways

Order Sets

Care Planning and Coordination

Population Management

- Reporting

Identify patient populations by risk and disease state

Manage populations instead of individuals

Identify Gaps in care

Team Based Care

- Multiple Roles on the Care Team
 - Provider
 - Primary Nurse
 - Care Manager
 - Pharmacy Clinician
 - Behavioral Provider
 - Social Work

EHR Interoperability

- NMHIC
- Direct Connections between organizations

Sharing:

Problem List

Medication List

Allergies

Lab and Radiology Results

Documentation

Summary

- EHR's can:

Enhance your ability to meet regulatory requirements

PQRS

MIPS

Meaningful Use

Reduce time and resources for documentation and billing

Drive standardization of care and improve outcomes
